

- Do YOU have trouble defending a fascist program when out speaking?
- Do you find yourself shook, rattled and rolled when people raise questions from the audience – without permission, let alone “proper vetting”?
- Do you feel that the police just don’t come fast enough or brutalize people hard enough when such unfortunate things happen?
- And do people mock you when you try to suppress the record of these encounters?

## Ask your doctor to tell you about the amazing new drug **Fascira!**

**Fascira** calms your nerves and shuts off whatever conscience or reason you have left and enables you to ignore the truth and threaten or carry out violence and censorship against those who question you. **Fascira** is a product of Trump-Pence Drugs, which has also brought you **Theocratica** for those who are troubled by scientific thinking, **Bullira** that enhances your ability to do vicious personal attacks, and **Numbora** for those who don’t want to fully face the anguish they feel at the threat to humanity.

Steve Mnuchin,  
U.S. Secretary of the Treasury

Side effects: **Fascira™** enables an epidemic of poverty, lack of medical care and homelessness in the inner cities and beyond. In repeated studies, **Fascira™** has been shown to cause inability to ascertain truth or exhibit compassion for human beings. **Fascira™** is known to contribute to life-threatening levels of environmental devastation. Users are known to spread virulent and violent xenophobia and white supremacy. Caution: Do not use **Fascira™** if you do not wish to be associated with violent ethnic cleansing, imposition of fundamentalist Christianity as law of the land, if you are uncomfortable with depriving women and LGBTQ people of their humanity, or if you are unwilling to be passive in the face of a demented bully with his finger on the nuclear button who poses an existential danger to humanity.
