A FETUS IS NOT A BABY

Women are not objects. Women are not things to be used for the sexual pleasure of men nor are they breeders of children. WOMEN ARE HUMAN BEINGS CAPABLE OF FULL EQUALITY IN EVERY REALM!

Our mission is to challenge the new generation in particular to reject this culture of rape and pornography, to resist the shaming of women who have sex and/or abortions, to wage fierce cultural and political resistance to wake others up, and to celebrate, fight for, and win the full equality and liberation of women.

A FETUS IS NOT A BABY!

1. A fetus is not yet a human being. It is nothing but a clump of cells with the potential to become a human being. It is "alive," but that is also true of all the other cells in a woman’s body. It has no life of its own yet. It is not yet a separate life from the life of the woman in whose uterus it is.

2. The anti-abortionists carry big signs showing fetuses floating around in a woman’s uterus, as if they are totally separate from women. But contrary to how they portray things, an embryo or fetus can’t survive on its own. It gets oxygen from woman’s blood, excretes waste through the woman ... And this is true until the fetus is born and becomes a baby. It is no more an independent human being than any other organ or part of a woman’s body.

3. 90% of abortions take place in the first trimester. (first three months). Three weeks into the pregnancy, the whole embryo is still only about 2 mm (2 millimeters) long, or about the size of the letter “o”.

4. By the third month of pregnancy the embryo, now called a fetus, starts to look a little more “human” as it grows arms, legs, sex organs, fingers, and toes. It is undergoing a lot of changes, but inside, its internal organs, muscles, skeleton, and nervous system are still very undeveloped. The whole thing is still only about 60mm long, that is about 2-1/2 inches.

5. Even at the end of the second trimester a fetus cannot survive outside the woman’s uterus without special medical measures. Its brain is still very unformed. Its lungs are not ready to take in air. It is still very much a part of the woman’s body and completely dependent on her bodily processes. It is not a human being until it is born, and takes its first breath.

6. Pregnancy is not some mysterious event guided by outside forces either. It is part of the normal processes of the woman’s body. And, the choice of whether or not to carry an embryo or fetus to term, or to have an abortion, belongs to the woman. A woman has no moral obligation to carry a fetus to term simply because she gets pregnant. A woman who chooses at whatever point and for whatever reason to terminate a pregnancy, should feel fine about doing so and should be able to.

When it comes to abortion, there really is only one moral question: Will women be free to determine their own lives, including whether and when they will bear children, or will women be subjugated to patriarchal male authority, whether it comes down at the hand of another person or the church or the government, and forced to breed against their will?

ABORTION ON DEMAND AND WITHOUT APOLOGY!
