

-----> **If you find it intolerable that a decent future or any future at all is in the balance as this system of Capitalism plunders and destroys the planet, ignoring what the science says...**

-----> **If you find it unacceptable for people to tolerate this in the name of “nothing can be done” and want to know how it is possible to give humanity a better future...**

# ...Then you need to be part of this Revolution and come to the **Revolution Club meeting**

October 31st, representatives of the world's governments will gather in Glasgow, Scotland for the global climate talks, following up on their complete failure to meet climate goals they set in 2015. While they use buzz words like “net zero emissions” and investing in “green energy”, the fact is none of these are solutions and these Climate talks will end in the same disaster the last one did.

Now more than ever we need to build for **real revolution**. There *is* a real scientific basis for hope, but there *is not* time to waste in getting real about what it will take. In a new article from Bob Avakian (BA), revolutionary leader and author of *The New Communism*, BA says straight up:

**“In today's world, to fundamentally change society, you must seize power —overthrow the existing state power and establish a new state power”**

**We are getting organized NOW for this revolution, and every month the Revolution Club holds meetings to grapple with why an actual revolution is necessary, what such a revolution involves, and what kind of society this is aiming for. At the meeting, we will discuss:**

>>> A short presentation about based on “Why The World Is So Messed Up, And What Can Be Done to Radically Change This—A Basic Scientific Understanding,” by Bob Avakian

>>> What a revolution makes possible, and how a new society, a genuinely socialist state, would handle the environmental emergency.

>>> How we are working together to seize this time to make revolution described in “A Declaration, A Call To Get Organized NOW For a REAL Revolution,” and urgently change the situation where far too few people know about this revolution, and are with it.
