Watch our website and social media for ways to participate.

**April 9 (Saturday):  
Nationwide PROTEST!**  
NYC: 2 pm Union Sq (south side)

In the streets again! We are coming back  
stronger, ABORTION STAYS LEGAL!  
Locations and Dates TBA on our website

**The Supreme Court is on track to gut or overturn women's fundamental right to abortion by late spring.** Already Texas is under a near total abortion ban.

**Denying the right to abortion does grotesque physical, emotional, societal, and psychic violence to women by forcing them to have children against their will.** Forced motherhood is female enslavement! The denial of abortion rights hits Black women and other women of color especially hard and is bound up with a theocratic, fascist program which also takes aim at the rights of LGBTQ people.

**The violent subjugation of half of society must not be accommodated, excused, downplayed, or surrendered to. IT MUST BE STOPPED!**

**Our only way forward and our best way forward is to resist** and fill the streets with our fury. Growing in numbers, in cities and small towns, uniting all who can be united and coming back stronger in continuing, sustained, nonviolent mass protest. Shaking all of society with our determination. Drawing inspiration from the mighty outpourings of women and others around the world against patriarchal degradation.

Together we can change the whole political atmosphere throughout society and what women-haters - from the Supreme Court to the State Houses to the streets - feel they can get away with. Rising up with courage and conviction to defeat this assault while bringing closer a future where women and all people are free.

**NOW is the time to stand up, together, as if our lives depend upon it—for, in fact, they do.**
