

YOU ARE INVITED:

Getting Beyond Capitalism

*And Beyond Mamdani-Style
"Democratic Socialism,"
Beyond the Whole System,
To Something
Far Better*

**BERKELEY
SATURDAY SEPT 5
10AM - 6PM**

**A day of talks
and workshops**
on the need and possibility of an
actual revolution, and a
fundamentally different system

lunch & dinner provided
\$10-\$30 sliding scale
register for location info

If you refuse to accept this system's future of fascism, war, and climate catastrophe... If you want to understand the *root* of the problem and the *real* solution... If you have ever dreamed of a better world or even wondered if that is possible...

And if you are serious about digging deeply into the biggest questions that will shape humanity's future... Reserve the day to come together with others.

Topics will include:

** Is the root of the problem deeper than "greedy billionaires"? How does capitalism actually work?

** What is science and why do you need science - not competing "truths" based on "identity" - to understand and change the world?

** What is a real revolution? Why is it more possible in the time we're living in now? What's the strategy?

** What will the new revolutionary socialist system look like? How is this radically different than Mamdani-style "socialism" within the existing system?

** Why is the revolutionary leader Bob Avakian such a big deal? What's the new communism he's developed? Why is Avakian so controversial?

** What difference can I make in this revolution?
